## **Education**

Software Engineering (3.84 GPA)  
Bachelor of Psychology

University of Victoria  
Brock University

Fall 2013 - Present  
Fall 2008 - Spring 2011

## **Projects**

*Board Game Tracking*

[boardgametracking.com](http://boardgametracking.com)

*Technologies :* Bootstrap, Angular, MongoDB, NodeJs, Express

- A Web application that allows real time tracking of money in board games like Monopoly or Powergrid.
- I am the owner and maintainer of the application.
- The server is Nodejs with Express, the frontend logic is controlled with Angular JS

*TimeTracker*

*Technologies:* ForerunnerDB, Angular, Bootstrap, Coffeescript

- A webpage that is used to track time with other people.
- I wrote the calendar page and helped integrate forerunnerdb into the page.
- The project is written in Coffeescript with angular controlling all functions

## **Work Experience**

*QA Analyst*

*Latitude Geographics*

*Spring 2015*

- Designed and implemented a selenium based application that automated tedious tasks in testing
- Found and reported over 50 bugs and assisted in the testing of fix versions
- Tested and released an update of the Geocortex HTML5 Viewer
